## THE ELECTORIL COMMISSION,

The perfector chim of re-pair lemocrats that the republicans so è the precibe of eight years ago is now made the basis of insulfing charges that the republican nat one consistence has been attempting to count in Mr. Baine to fraud. "The republicans stoke he presidence once," it is said, "find now they are trying to steal it again." This claim is a terly false and groundless. The ejectors commission was constituted by the resulgescentifies of bath parties in congress. It was evised by a joint committee of the two houses on waits hath parties were equally represented, and with the exception of consily represented and with the execution of equally represente, and with the exception of Benator Morton, reliabilities, the committee wis manifered in its staffice. After a charply contested details in both more the fill reported by the committee probable was the fill reported by the committee probable was the possible to make the republicants stating 24 years to 16 may, and their democrate 23 years to 16 may, and the democrate 23 years to 16 may about or not voting 9 republicants and 1 democrate. In the bound there were 194 years to 85 years the democrate and 1 the probable was the probability and 1 democrate. cave. The democratic atom (158) case and 18 page. and the republicant 33 per et a 38, rays; about or not voting, 7 moublicant apd 7 democrate. The democrate it will be seed, were more unite i in favor of the bill than the republicans. In the two houses they were overwhelplingly in favor of the commission, 1997 voting for and only 19 against it, while he republican senators and expresentatives were very closely divided, with a majority against fig. 40 voting for and 55 against The approbations of the consulsator might

therefore be creaked to the democrats. If wis organized precisely as the bill provided, three reguldicans and two dense was being taken by agreement from the serute, just three demograin and two nern diegos from the house. The cause and two reput pleans from regions. The four justices of the superint court designated by the bill as members of this tribunt were evenly distort justi-lially. The fifth justice, who was promptly selected by these as the bill provided, was a republican. To do tributal thus consti-tated all the condicting questions, arising out of the presentation of discordant certificates of the electoral colleges of certain states were referred. and the decisions of the commission were to stand unless reported by the comment vote of both houses. In other word, the republica-and the delinerals in congress being madde to agree upon these objections, referred them to a third partly in order to asset the inspecting fun-ger which threatened the cores of the country. No more patriotic measure has ere—been a logical by the concurrent pition of contrading parties. In congress since the formation of the government, and concerning the window and expedi-ency of this measure in to light of the circum-stances then existing not to speak of its results of peace and safety to all this interests of the country which followed, there but be no serious

bly raised is whether the commission did what it was interested by those who voted for it that it should do. In other words the gristion which might reasonably be raised is whother there was an understood agreement that the commission should go behind the returns. The republicans of course, who persistently dealed the right of the countsion to go behind the pittures, requ-Matesthe liter that there was such an agree-Setutor Thurman, our of the democratic members of the committee which framed the bill, said in his speece origing its passage: "Phis bilt gives to this commission the same powers that the houses of congress separately or togother have, whatever these powers are. If constitutionally they may go behind the decision of a returning boar, this commission can go behind it: if constitutionally they cannot go behind that decision, this commission cannot go behind it." In 1973, when no party-conflict was warping men's jir gmen; spendar Thurman thought that the two houses of congress could not go behind the decision of a recurring boards While discessing a resolution then to impairs and report whether the resemble cetton of electors of president in the states of Arkansas and Louisiana, had been concusted in accordance with the laws of the United States," he said:

I know of no power vested in congress to plass my law on this subject except a law fixing the time when the electors shall be choken. Each state is to appoint its electors in the min-per the legislature thereof shall direct. If there be in a constant in sects and diseas. If there he may content of the light of persons to hold the office of elector, it is ease to have been the contemplation of the framers of the constitution that that was to be provided for by the states that sects; that each state must determine in or ha mode as it shall provide any questions that may arise between different persons claim-ing to be elected to librat office. No jurisdiction over the subject seems to have been given con-

pater Bayard, a potling demagnatic member over the becomed rotes. "Nowhere," raid, "Is power given to either house of congreen to pass up on the election, either the man-ner or the fact, of jelectors for president and vice-president; and if the congress of the United States, either one of both bouses, shall assume, make the main manner of the first president assume.

In the debate in the senance of the passage of the electoral bill, bir. Thoman and Mr. El-mands both declared that the commission whe only to interpret the existing law about electors. not to make new regulations. The commission, the scale with world hash only such powers as the two in uses of compress have trude the constitution. Senators Thurman and Be, and had both uon. Secators thurman that is, are had bound said that congress had no power a go behind the returns. It is simple tably now, after all Brese declarations made in open celute; for the denocrats to say that there was an understood agreement that the commission about the history. agreement that the commission should go bebind the returns. There is another thing which renders it still more improbable that sensing Edmands and the trapulitars who vated for the electoral bill imported that the remainstim should go behind the returns. The Origin conspiring was reignated for the express purpose, a. Mr. Hewitti the chairmand of the delap-cratic national committee, has said several times, of compelling the republicans to go behind the returns in Florida and Lauisiana. It is absurd to suppose that Mr. Belmands, or any other resorblican, would, in view of the fact that Senators Thurman and Beyard had declared that congress could not go bedded the returns, emer into an agreement not authorized by the constitution, which should secure to Tildea and bla co-conspirators the benedits of the trees a

the states the democrats practically concern level. The western shore of this lake is clearly distinct the population, when they refused to neck it angieses in the national concert for the description of the state of the species of the state of the sta fers the people with it, with Mr. This may the reandidate. The bisisess charge has been kept after simply as improved some if Morgan's recovering the passion of the ignormal observations and the interpretable in the passion of the ignormal observations and there will be come in the passion of the ignormal observation of the interpretable in the improvement would be required for in the full improvement would be required for the interpretable in th strong the regarded of the seasons o

dites. The returns as first gives.

BY RIGH AND WATER.

Richardon of treasportation totally rail has began thressel provided: So remarkably as in the lentrage of grain from Chi ago to New York. The consequence is that while only 15 per cent of the shipmen's of grain toon Chinearly one-half of the whole amount is now shippe, in his minner. To get a bride, of wheat carried four chicago to New York by rail dow costs about 15 cents. In 1988 the averago rate was 12 cents. Nor has the redections in transportation tharges stopped at the emboard. It has been largely instrumental intringing rule once relaxed of course should enter grain and other produce to Europe at lower tales on an average than are paid from

Chierles to Newl York.

To the competition of the lakes is due in large part the great reduction of the rail rates; but it is also due in part to the competition of the railron's with each other. The freighting busi-Chierize to New York. ness in the great takes in grain, builer, coal and iron ore, is immease. Formerly this basiness was carried an urainly by small scheomers: but while that description of vessels at length of moret larger capacity is still employed, the films been much the same change in the methods of transportation on the likes as I have last seen on the ocean. Sathing cossels turne beer to a considerable extent supplanted by large propellers and by barges towed by the propells is. A screw stemmer, herself carrying say sevenly-five thousand bushels of grain, takes threefur four of hisse burges or of sche mers in low, in king the time of the trip germin, and getting much help from the sails of the latter. These lows frague rily narry in the aggregate two hundred thousand bushels or more of grain. The size of the sch waers has been, greatly en ages, some of them carrying as much grain as the long et sailing slops which cross the Atlans the parties of transportation on the allows too, have been boosed down to comparatively low ignress by rathord commetition, grain that ing been carried from Chicago to Brifable at

thing as low as one cent per basis 3.

The lake marine of the United States is not only sell elected to stance competition from the railpopts, but he also to contend a country with Canadia r vesses, which have set stantially the sum a iventages as foreign craft i on the otentialize over American resoles, in that they are tipre cheaply built and manned can are ours. Nevertheless, there has been a nurked inthe Ase marine during the and earlying equality of the Ase marine during the last few years, and the rospect is jihay, in spite of all dispouragemen s, it will continue to increase. It is likely that still further economies will be much by enmay specify the vessels and by the improve-larging the vessels and by the improve-netal in engines which has so ferreally reduced the consumption of spill by the years (Samers). The substitution of from find suc-for posel, which has already may exope progress or the lakes, will be another galu in coupling and also by the safety of the drago by the tacking which this gives for dividing the Luil nto compartn ents and by is addition of strength. This charge will be accelerated in proportion as it shall be realized that increased consumption of iron is a better basis for the produce than a ligh price and limited consum that for an acticle whose production has no limit. It on as a material for water graftless even more advantages in fresh vacte than in soit. In this, in addition to the increase of exfreight stramers and towed freight barges, is the next great step of progress in the economies of transportation on the likes and ou

the great rivers.

The transit of all this on our north western tive ts is much diminished by the frequency of falls or rapids that interrupt maring tion. In time this will partly be jobalated on the triangliar river by construction of canals and locks; but there will be a lorg-time to wait. Any when these weeks shall have been completed it will be necessary to flarow our branch railways from points on the upper ricer into the surregarding compry, in order that the open navigatio (of the

# The may be de rea advantage to the country.

Captain Gottinge recently stated that , in Pair ama can'd would be completed in twe years, at a cost of \$120,000,000. He said that so much money had already been invested as to make it impossible to abandon the undertaking. To this cipitain leafor Pfine of the British navy, this Ciptain Bedfor'l Pine of the British navy, replies that the work can not be completed for any sample more that can now be estimated, nor within a reasonable time. No combarison, he says, can be fairly instituted between the Sucz and Pananan enterprises.

Pandina is very difficult to work: it crops up when least expected in the shape differ of houlders of large size or belges so hard as to defy the ordinary tool. Then the climate is deadly, and laborers there dely a Rie financial calculation and control. Captain Pine frankly adds, 48 hours escent the day when a little of the littlefon now perpetrated by the Franch at intrusion now perpetrated by the Fruch at Fanaina would have raised such a storm of just indignat on from Maine to Califor in as would have lend by the Morner doubling shard but in preafer relief than ever." But Americans now workload for the man were." don't care for an independent or masterly tar-dignipoley, and will not even consider it in a prepletation of the American way. Hour 2 diminal Shufeldt of the American way

pass no mine the electror, either the man-be fact, of jelectors for president and sident; and if the congress of the United either one of both houses, shall assume, be guise or present of telling or compring the guise or present of telling or compring to the distance of the proposed cands was that of Neuragon. It under the guiss or present of telling or compling a value to decide the flact of the electric of electrons who are to form the collage by whom the president and vice-president are to be chosen, then they will have taken upon Odmissives authority for which Lifer one can find an warrant in this charter of lighted powers."

In the doubte in the scan condition to assault of the remained doctors per cent. For this cann't apon an accounted cost of construction of \$75,000,000. Stateful asserts that not less than \$800,000,000. will be required to carry out the Panama scheme, and then it will be done only by the ceit is abandonment of the plans or a statement canal and a change to a canal with look. Money energith will build the Carlad, he says, but the canal will necessary on the candl will never pay any profit on the entrangua sums it will absorb. Testimony to the same effect, out with more fullness of detail, its given in an art che published in the tracer's a keyliner of Cleage, and written by a gentleman who has give i several nonths to the cassful study of the Panama canal on the ground, and with spe-cial facil ties for seeing the inside of things. He reports that May I last, after two years of excareports and say last, after two years of excatations, there had been dug only 4,000,000 endiented so t of a total of 130,000,000 needed. And that whit, has been done is the ency part of the week. To store the Chapter silver astone will two miles long and one hundred and corte feet high at its greatest e valion

nust be constructed; and this part of the work alone will cost \$560,000,000. The facility with which the Nicaragu canal could be constructed nakes a striking c inpariworth the contract with this produce a surrying compari-son are to tract with this produce is an easily worth a landama. In this produce is the contract his best of accomplished a large partition of the worth. A remarka the depression of the great confilled chain of mountains—the lowest on either continent—is found hereon the su unit of nis electrospinal are the behavior of the through a finding that the partitible reversible the declaring that the behavior as the democracy practically and the depth of which in places approaches the taken a state of the behavior and the depth of which in places approaches the occur level. The western shore of this lake is

## TALK AND S SCHLATION.

Light on the pandary it this city over the vote for dame and there it is fermished by regulation of infigural net and a near five dot.

Mr. Blaine. This gent man says: 'If this first carries fails to show hat Mr. Blaine has a nijerity the real excitement of the campaign will height, for, as sure - 1 saind here, John holdy was soft out by a tree, and his friend sure pot done with him. Is no see there was some of done with him. Is no see there was some not done with him. I st cose there was some Cleveland and elect his candidate for mayor, Grant. At the lest minute some of Clevelaul's managers came lown from Albany and propose. oran. At the less minute some or coverance managers came lower from Alamy and proposes a deal, which Kelly needed. He agreed to vite Tammany for Clejciand if Irving hai world firew Crange overloand and cole for Grant. That started the runner last Maday night that Grave that without and by noon, best and then the nest consist with this county democracy to be at the bones, and by noon, best day had been be nest consist with this county democracy to be at the bones. It was had then wheeled around, or I after noting lightly all the morning, poured a its vate for Grace Thus the two factions which for Grace and while the republicans, ke wing they had been sold out by Kothly stood hytelibbs sufficiently to secure Grace a paradity. John Kelly was neath trapped, but let me tell you to is not the man to do things by ha've, or to in cough without a retreating base. There were as pany as 16,000 fraudulent rotes east by Tamman's and the county democracy, and Kelly can turn state's ordence if he is a disposed and knowly and changed and changed and county democracy, and Kelly can turn state's ordence of he is a disposed and knowly and all shoots.

"You will observe," continued this pentles man, "that although it was a close afid exciting general, and every last to c was supposed to be only, there were some 14,000 registery) names left unvited at night on "nestay. Why should be VORK STATE left unveted at hight on "ueslay. Who should the common stay away from the poils in such a fight? It is absurd to thick that any scient thing happened. If the republicans on the beart of registration object to a name, the Tamonay man or the Irving half man will assert pleetively that he knows such a man, where he ives, what ho does for a wing, and do it so chooses what ho does for a wing, and do it so chooses when he had no man to stay to tively that he knows are a man, where he lives what he does for a sing, not do not so cit constantially that the name has to stay, or election day repealers drive up to the polls in precinct after present, and cone under the sperious name and positions a given then to construct with the final polls of the polls in precinct after present, and cone under the speriously registered. The same in the first places change is these and shart out again. If the republicance in these detection has not near hought the goal trying to do his cut howestly and supports we, he south-taked by the democratic. The republicans in New York have very little change to chear I they want to supply the change to chear I they want as soor lift honest one. If Bl time should have a plurality sufficient to gave him New York. Birth-six elections togs, which have been considered in the house of the first own fraids; but if the state is given to the electional when we will have also any from Ceychand I hink what I have said explains what the na found committee are coing just at present.

AN FYNTUI "ASSAGE.

QUEBEC, Nov 13.—The steamship Scotland, from London, just arrived, had an eventful gassage. She feft London last week with a general cargo for Quebec and Montreal, and five passengers. Among the hand; were eighteen rattle men. After the chip hail been a few days at see one of these men was taked down with small pox of a modified form. The captain promptly had thin solated and told, one of his companions to wait upon him. The disease did not spread, and the man and altendant were landed at the quarantine station, where the ship not suread, and the man and attendant were landed at the quarantine station, where the ship was twice thoroughly furigized and clothing burned. On arrival of the wessel here physicians ordered another 'smigation of the ship ain, allowed her to proceed to Montreal. No one was permitted to land here. Some day ago the cattle men became inclineus and broke into the mess and storerooms, appropriating liquous and creating constraints or generally. Their inand creating consternation generally. Their in-subordination was of short duration, as the six ringleaden were promptly placed in from and now have to face montreal ustice for this con-duct

STEAMER NOTES FROM QUISEC, QUEEEC, Nov 13.—The nail steamship Paris-ian will make her last trip from this port this season on Salurday, and the Circassian and the Brooklyn, which sail the Salurday following, will be the inst steamers hence this way. Brooklyn, which sall the Saturday following, will be the last steamers hence this year. The steamship Scotland from London, now inward between Farther Point and Quebet, is reported to have a case of smallpox on board Efforts are being made to allow the pesse to proceed to Montreal, on account of the lateness of the season. She has only five passenged in all, and the patient will probably be removed to the marine hospital on arriving here, and the vessel them be fundamental and allowed to proceed SKYEN PERSOAS DROWNER.
